

Please Take Part in Gulf Coast Seaweed Survey

So through my sustainability studies at Texas State University, master's program, I've been recruited to help finish some research that will be published; survey marketing project that is reviewing "the marketability of a seaweed-based compost as a "boutique" compost. The seaweed is an invasive species on the Gulf Coast. " We need 250 more surveys of gardeners who just look at samples of the compost. We need 10 people to actually try gardening with the compost & do interviews later. Anyone interested in taking a seaweed survey for your garden? I am in the Central Texas area doing this research. Please sign up on my site if you are interested in participating in this study.

If you would like to read more about the impact of the latest news on the **Gulf of Mexico Research Initiative** check out the article listed to the featured picture; What Lies Beneath: Scientists Study Seaweed to Understand Gulf Oil Impacts.

Beats for Change-Denmark makes a Difference

Although our goal is to promote American sustainability we can learn from other countries. Soren from Denmark invited me to become a part of something outstanding through [Care2.com](http://www.care2.com).

Beats4Change encourages cultural activities to raise awareness and funding for sustainable development of caring communities

<http://www.beats4change.org>

Cultural and economical activities, based on principles of mutual aid, which lead to:

- a world economy with ecological and social responsibility
- a free and manifold world culture
- the creation of a common future, based on work, knowledge and love
